Haris Ahmad

Student – BSCS

Driven by a passion for solving complex problems, I craft innovative solutions to enhance user experiences. Committed to pushing technological boundaries for intuitive designs, I thrive on challenges with my creativity.

Projects

Educationist
Android Application

Developed and launched 'Educationist', streamlining access to O' level past paper catalogues for students worldwide, resulting in 10K+ installations. Reduced complexity in exam preparation, enhancing academic success.

Vibes Connect
Full stack Social Media Website

Designed and launched 'Vibes Connect' as our Database Systems project, utilizing AI for semantic analysis to form user personas. Developed personalized recommender system, fostering meaningful social connections.

Reinnovate Labs
Frontend Website

Implemented frontend UI for Reinnovate Labs, showcasing CAD design projects with a responsive and visually stunning interface. Facilitated client acquisition through engaging website presentation, enhancing company visibility and appeal.

Cyber Soar
Android Application – Game

Developed 'Cyber Soar' game featuring three thrilling modes, immersing players as robots navigating through pipes for high scores. Delivered endless fun and excitement, engaging users with an addictive gameplay.

Flappy SHS
Desktop Application – Game

Built 'Flappy SHS', a Flappy Bird clone game project in C++ using SFML. Implemented object-oriented programming principles for seamless gameplay mechanics and modular source code.

NERDLE
Desktop Application – Game

Created 'NERDLE', a word game akin to Wordle, utilizing a dataset of over 14K words. Employed AVL tree optimization for dynamic difficulty adjustment, ensuring a natural gameplay experience.
